Summary

My goal is to work in an innovative environment where I can contribute as part of a team to enhance current technologies and be an integral member to developing new applications. As a developing professional in the IT industry, I always enjoy taking advantage of opportunities to learn new practices and new skills. I commit to any projects I work on and am very resourceful when accomplishing tasks. I really enjoy taking an idea and bringing it to life through software and maintaining control over the visual appearance and functionality. It allows me to combine my creative side with my technical mind and I feel a great sense of satisfaction and accomplishment when presenting finished products.
